

Greyhound Rescue of New York

August 2017 Newsletter

Okay where did summer go? I was just in short sleeves and now I'm wearing fleece. It's a good thing there are cider donuts to ease the need to bundle back up.

However, that beginning sentence needs to be edited to how fortunate GRoNY. We know the four seasons each have their own unique perks bringing mud in Spring, heat in Summer, brilliant color trees in Fall and the brrr chilly air, which will prepare us for the white stuff which will come in Winter. Our hearts go out to Texas residents, two legged and four legged, all are going thru so much more than I have ever incurred, nor would want to. Hoping our GRoNY greyhound family who moved there because of a work transfer last year, is doing okay.

Do you have an evaluation plan for your family? I did not however during a visit to the NY State Fair, which has many venues, vendors and events, there was an emergency preparation class. At the end of the class, we had a backpack with a starter kit, and were instructed to add and personalize the kit for our family. This class was enlightening and informative, and mostly a wakeup call for my non preparedness, there is a website, <https://prepare.ny.gov> it does provide an online class and information which could be of help in planning for your family and your greyhounds' safety.

With that being mentioned, has your address or email changed? GRoNY tries to keep the database and information updated, please take a moment to reply and send GRoNY your new address, if you have moved during the time you have adopted your fur-kid.

One last note on the short newsletter, the 2018 Celebrating Greyhound calendars have arrived and will be available for purchase at the September 10th clinics. Remember one clinic will be in Saratoga at the Farmer Market on Route 9 and the other will be at the Carrot Festival on Route 7 in Niskayuna, check GRoNY website www.greyhoundrescueofny.com for directions to each clinic. Plus for those who would like to order by email for pick up at a future clinic, or if mailed there is additional for postage.

Stop at a clinic when you can, send a note to let GRoNY know you are doing okay if you are unable to stop by a clinic.

Nice chatting with you, until the next time
