

Greyhound Rescue of New York

February 2018 Newsletter

Hello members. Hope you were able to enjoy the recent mild, I know after the snow melted there were hidden treasures, or rather greyhound droppings that I was able to remove from the yard. With the sun and the temperatures reaching 40, it was time for the leashes to jiggle; the greyhound thought they were going for a walk, however, the only energy that this owner had was to put the hounds in the van and take them for an exciting drive thru the car wash, hence getting the salt off the van. Not sure I even saw the evening news that evening but then it was a full day of activities.

February began with a road trip to pick up two newbies; there is also an event scheduled at Healthy Pet Center, as well as clinics, you will need to look at the GRoNY website www.greyhoundrescueofny.com to see the most appropriate and serendipity name of one of the new males who arrived.

Have you noticed the days are getting longer, yeah! Of course it is confusing the greyhounds and their internal - feed me, it is time now - clock. There are still a few new adopters who have experienced their greyhound's ability and routine of their dishes will be filled however, then its spring ahead with our house clocks; which confuses greyhounds. Clocks changing means eating an hour later than what their internal clock has been accustomed to, hounds are totally okay with scarfing down the meal placed down but it is after an hour of pacing and wondering why are you starving me, I should have eaten an hour ago.

I apologize for the newsletter being short however, that's all the chatting time I can spend with everyone this month, there are newbie greyhounds in the house, and I need to pay attention to them.
